

Payment Arrangement and Disconnection Policy

Policy BP-210 · Cymbal Energy Billing Operations · Effective January 1, 2026

1. Payment arrangements

A payment arrangement spreads a past-due or current balance over equal monthly installments that are added to future bills.

- Eligibility: a balance of at least **\$100.00**, and **no payment arrangement on the account in the previous 12 months**.
- Length: **2 to 6 monthly installments**. Arrangements longer than 6 months require a Billing supervisor and are not available through self-service or the digital agent.
- Current charges must still be paid in full by their due date each month.
- Missing an installment cancels the arrangement, and the remaining balance becomes due immediately.
- Eligibility is decided by the billing system. Representatives and digital agents must not promise approval.

2. Budget Billing

Budget Billing averages the last 12 months of usage into a level monthly amount, reviewed every six months. Accounts must have no past-due balance to enroll.

3. Disconnection for nonpayment

Before disconnection, Cymbal Energy mails a written notice at least 10 days in advance and makes a courtesy call or text 48 hours in advance. Cymbal Energy never asks for payment by gift card, prepaid card or cryptocurrency, and never threatens same-day disconnection by phone.

4. When service will not be disconnected

- On Fridays, weekends, holidays, or the day before a holiday.
- When the National Weather Service forecasts a heat index of 98°F or higher, or a temperature of 32°F or lower, in the next 24 hours.
- For **30 days** after Cymbal Energy receives a **medical certificate** from a licensed physician stating that disconnection would endanger the health of someone in the home. The certificate can be renewed once for another 30 days.
- During a declared Major Storm Event in the customer's area.

5. Reconnection

After payment, service is normally reconnected within 24 hours. A \$35 reconnection fee applies, except during a declared Major Storm Event.

6. Assistance programs

Customers who are struggling to pay can be referred to the Low Income Home Energy Assistance Program (LIHEAP) through their county community action agency, and to the Cymbal Cares fund, which offers up to \$300 once every 12 months.
